Border census – lorry traffic to Denmark

Themes – based on partial results

Route distribution of lorry traffic in and out of Denmark

Lorries into Denmark per day

BORDER CENSUS

Record number of lorries cross the border

On average 5,126 lorries drove into Denmark every day during the second quarter 2012. This is more than ever before.

5,126 lorries drove into Denmark every day during the spring months. This is shown in new figures from ITD's border census covering the second quarter 2012. This represents an increase of 7.5 per cent compared to the same quarter last year.

Thus the record from 2008 declined. In the second quarter 2008, with the economy roaring away, 5,104 lorries took the trip into Denmark. Since then the number dived to 4,347 lorries during the comparable second quarter in the crisis year 2009. The record may indicate an upturn in the Danish economy.

Both foreign and Danish lorries are part of the increasing traffic into the country. The share of lorries with Danish number plates is stable. 23.6 per cent of the lorries

had Danish number plates during second quarter 2012 compared to 23.7 per cent in second quarter 2011.

The border census shows that the Danish transport companies gain real market shares on the Danish market at the moment. Of the foreign lorries driving into Denmark an increasing part – namely 34 per cent - is owned by Danish road hauliers. During the same quarter last year only 31 per cent of the foreign registered lorries were owned by Danish companies. 42 per cent Eastern European lorries crossing the border are Danish owned. This is the highest share ever.

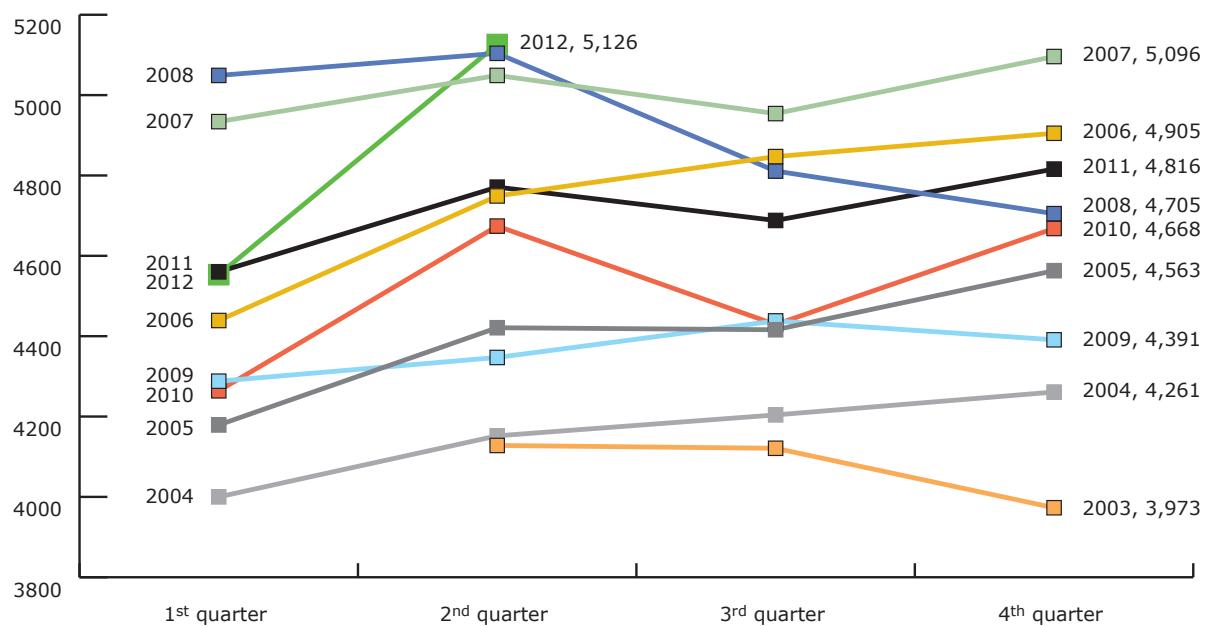

At the same time the figures show that German lorries lose market shares in Denmark. This may be a result in increasing driver shortage in Germany.

Border census – lorry traffic into Denmark

Quarter comparison 2003-2012

Note: The census includes lorries entering into Denmark using the Danish border in South Jutland, the Øresund Bridge and Scandlines A/S' ferry routes

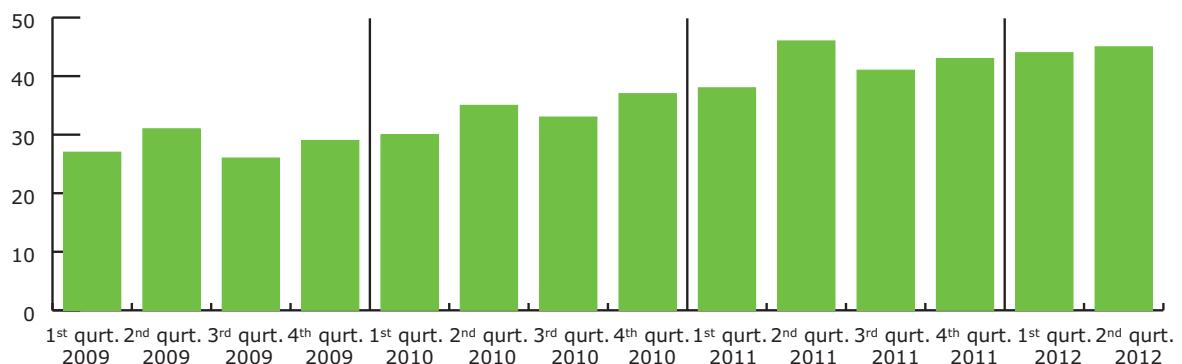

Nationality distribution

Note: The censuses on the Øresund Bridge are not divided into nationalities and are therefore not included in this report

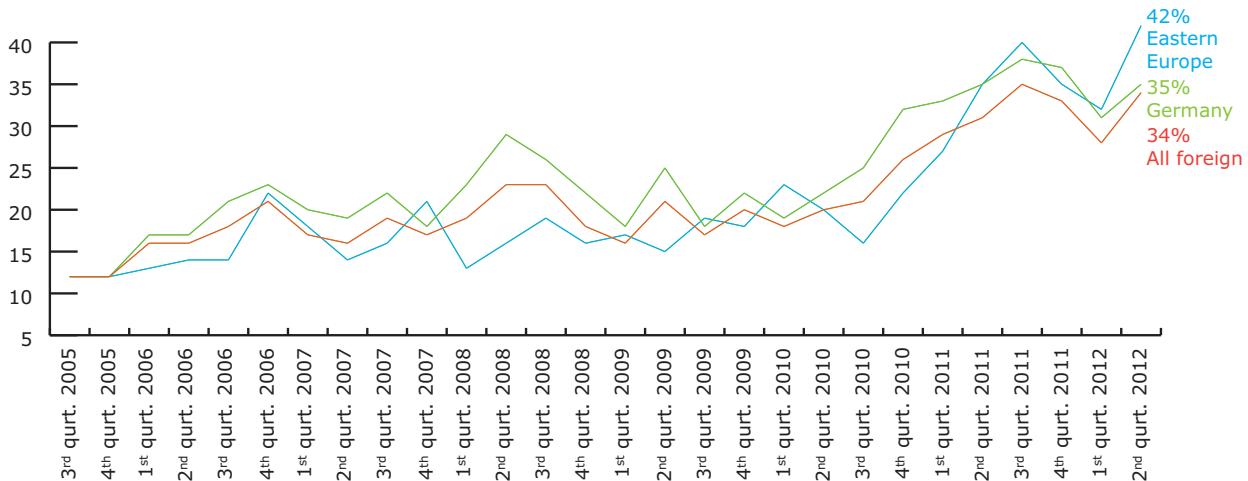

Themes – based on partial results

Lorries above 20 meters

Note: On Scandlines A/S' ferry route between Helsingør and Helsingborg and on the Øresund Bridge separate registrations of lorries above 20 meters have been made – this means of modular road trains and special transports except automobile transports

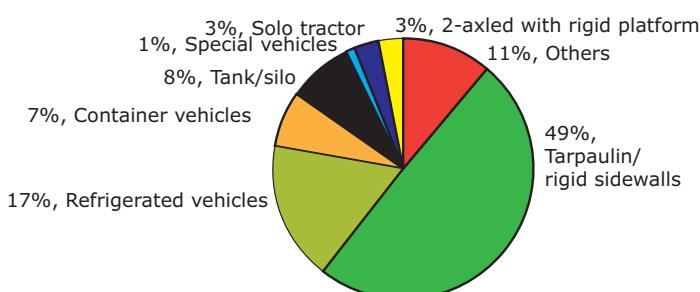

Share of foreign lorries owned by Danish subsidiaries

Note 1: On the Danish border in South Jutland near Padborg and Frøslev separate registrations have been made of foreign lorries belonging to Danish owned subsidiaries

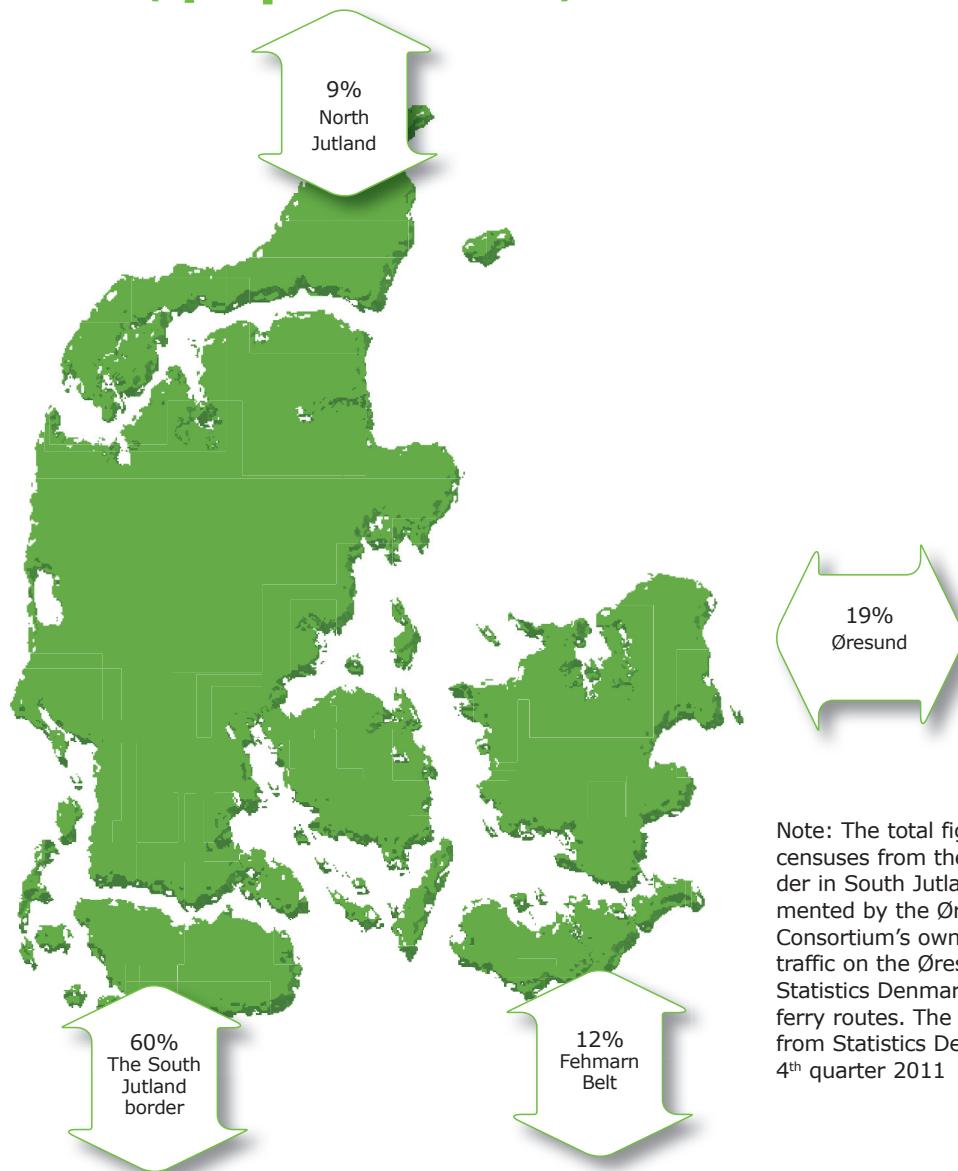

Note 2: Red: For every 100 foreign lorry 34 are owned by Danish road hauliers – Green: For every 100 German lorry 35 are owned by Danish road hauliers – Blue: For every 100 Eastern European lorry 42 are owned by Danish road hauliers

Type of material 2nd quarter 2012

Note: On the Danish border in South Jutland near Padborg and Frøslev separate registrations of type of material are made.

Route distribution of lorry traffic in and out of Denmark (4th quarter 2011)

Method

ITD's border censuses include lorries driving into Denmark across the Danish-German border and across the Øresund Bridge or using Scandlines A/S' ferry routes. ITD records the number of lorries with a manual cen-

sus every quarter during a representative period totalling 24 hours. ITD's border censuses indicate the very latest tendencies in international lorry traffic to and from Denmark. The statistics can be used with caution to

indicate export activities and business climate in Denmark. Read more about the method, and see background tables on www.itd.dk under the menu "service".
